TOM STROTHER

SOFTWARE DEVELOPER

- Nashville, TN
- 573.999.6990
- tstrotheriv@gmail.com
- tstrotheriv.github.io/
- linkedin.com/in/tomstrother/

Having founded two tech startups and being directly involved with building teams in my past work history, I truly understand a team's value. I know how crucial it is to have a calm and positive mindset in all situations, no matter the circumstance.

In the Software and Tech industry, continually learning and adapting is required. Over the past 15 years, I have self-taught myself all aspects of the entertainment industry. My start came as an audio engineer at the Conservatory of Recording arts but learned the skills required to not only operate but ultimately lead teams in Video, Lighting, Live Streaming, conference planning, and project management.

SKILLS SUMMARY

- JAVASCRIPT
- REACT
- HTML
- CSS
- BOOTSTRAP
- REACTSTRAP
- POSTMAN
- GIT/GITHUB
- AFRAME (VR)
- CLOUDINARY
- PYTHON
- DJANGO w/ ORM
- DJANGO Rest

EDUCATION

Nashville Software School
Full-stack Web Development Bootcamp

TECHNICAL EDUCATION

Nashville Software School | Apr 2020 - present

Focus: JavaScript, React, Python, and Django. 100% remote.

CLASS PROJECTS:

Welcome to Nashville: Single page web application using a Nashville parks API to gather data and display it in the DOM
Technology used: HTML5, CSS3, Javascript ES6, JSON, Bootstrap

Github: https://github.com/nss-cohort-40/welcome-to-nashvillle-skipping-rocks

Arboretum: Arboretum is a "command line interface" group project built using Python.
Technology used: Python CLI

Github: https://github.com/nss-cohort-40/c40-keahua-arboretum-da_beach_combers

Nutshell: Nutshell is a user dashboard with a login and authentication, chat feed between users, to do list, and a section populated by a 3rd party API.
**Technology used: JavaScript ES6, HTML5, CSS3, JSON-Server, Postman, RESTful API**

Github: https://github.com/nss-cohort-40/c40-keahua-arboretum-da_beach_combers

CAPSTONE PROJECTS

MyListing360 VR React App
MyListing360 is an application for creating and and sharing immersive virtual tours of homes.

Technology Used: React, A-Frame, Cloudinary, Reactstrap, Google Analytics, HTML, CSS, JSX, Adobe XD, Photoshop, Premier Pro

https://github.com/tstrotherIV/MyListing360

MasterPlan (IN PROGRESS)
MasterPlan is a project management system specific to the corporate events Industry. It provides every field specific to events eliminating the need to build every to-do as you would in other generic management system templates.

Technology Used: Django Full Stack Application, Bootstrap

https://github.com/tstrotherIV/masterplan
